

Lithium Batteries in Evelop Airlines

(In case of any doubt please contact with us in gops.specialrequeriments@evelop.com)

Battery Type. Vat. hour (Wh) = Amp. hour (Ah) x Voltage (V)		IN HAND BAGGAGE		IN CHECKED BAGGAGE	
		Installed in device	As Spare battery	Installed in device	As Spare battery
Lithium Ion equal or less than 100Wh Lithium Metal equal or less than 2g Examples: Cell phones, Cameras, tablets, and most laptops, watches, mp3 players, hearing aids, remote control, drones. Smartbags with removable battery		YES (Max.15 devices)	YES (Max.20 batteries)	YES (Max.15 devices)	NO
Lithium Ion bigger than 100Wh less or equal 160Wh Lithium Metal bigger than 2g less or equal 8g Examples: Audio visual equipment (professional), portable medical equipment (AED – Automated External Defibrillator), drones. Power banks between 20.000 mAh to 32.000 mAh. Smartbags with <u>removable battery</u> .		YES* *(Approval required)	YES* *(Approval required)	YES* *(Approval required)	NO
Lithium Ion / Metal Examples: Power banks up to 20.000 mAh, artificial / e- cigarettes, e-pipes and personal vaporizers of any kind.		YES (Max.15 devices)	YES (Max.20 batteries)	NO	NO
Lithium Ion Self-balancing devices at any Watt hours Examples: Hoverboards, solo-wheels, air-wheels, oxboards, e- skates, waveboards, small electrical vehicles of any kind. Not considered as mobile aids.		NOT PERMITTED (EVEN WITHOUT BATTERY)			
Lithium Ion With watt hours MORE than 160Wh Examples: Electric bikes, car battery.		NOT PERMITTED			
<p>A maximum of 15 devices & 20 spare batteries, equal or less than 100Wh, are allowed for each passenger, these limits can be exceeded with company approval Always protect spare batteries by insulating the terminals to prevent lithium batteries from short circuit by taping over exposed terminals or placing each battery in a separate plastic bag or protective pouch; Do not pack any spare batteries in your check-in baggage; Always bring your lithium battery operated devices with you in your hand baggage; Never move your seat if your device has slipped between the seat. Always call a flight attendant for assistance; It is not allowed to carry damaged lithium batteries or use them in your device onboard. In case of bad function, overheat or any change on physical characteristics, alert crew immediately.</p>
